TAP INTO A NEW POSSIBILITY for depression

COMPANY PRESENTATION
NASDAQ: STIM
November 2022
This presentation contains estimates and other statistical data prepared by independent parties and by Neuronetics, Inc. (the "Company") relating to market size and growth and other data about the industry in which the Company operates. These estimates and data involve a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates and data.

Certain statements in this presentation and the accompanying oral commentary are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements, including statements relating to the Company’s business strategy and financial metrics as well as revenue, operating expense and earnings guidance and projections for future periods, relate to future events or the future financial performance of the Company and involve known and unknown risks, uncertainties and other factors that may cause the actual results, levels of activity, performance or achievements of the Company or its industry to be materially different from those expressed or implied by any forward-looking statements. In some cases, forward-looking statements can be identified by terminology such as “may,” “will,” “could,” “would,” “should,” “expect,” “plan,” “anticipate,” “intend,” “believe,” “estimate,” “predict,” “potential” or other comparable terminology, as well as the negative of such statements. All statements other than statements of historical fact may be deemed to be forward-looking statements, including those concerning any expectations regarding investment returns; any projections of financial information; any statements about historical results that may suggest trends for our business; any statements of the plans, strategies, and objectives of management for future operations; any statements of expectation or belief regarding future events, potential markets or market size, additional indications or technology developments; developments in clinical trials or regulatory review of NeuroStar® Advanced Therapy System for additional indications; and any statements of assumptions underlying any of the items mentioned. The Company has based these forward-looking statements on its current expectations, assumptions, estimates and projections. While the Company believes these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks and uncertainties, many of which are beyond the Company’s control. These and other important factors may cause actual results, performance or achievements to differ materially from those expressed or implied by such forward-looking statements. The forward-looking statements in this presentation are made only as of the date hereof. Except as required by law, the Company assumes no obligation and does not intend to update these forward-looking statements or to conform these statements to actual results or to changes in the Company’s expectations, assumptions, estimates and projections.

Our Mission: Renewing Lives by Transforming Neurohealth

NeuroStar Advanced Therapy for Mental Health

Prevalence
Adults with Major Depressive Disorder (MDD) (21 million US adults) or Obsessive-Compulsive Disorder (OCD) (4 million US adults)

Market Leader
Market leader in TMS for depression with over 5.0 million treatment sessions and over 141,000 patients treated

Sales & Customer Support
Largest direct sales and customer support team in the industry

Reimbursement
Broad US reimbursement among commercial and government payors

Clinical Dataset
Largest clinical dataset in TMS for depression

Outcomes Registry
Largest depression outcomes registry in the world

Indications & Growth
New indication opportunities and geographic expansion for growth (Anxious Depression and OCD added 2022)
Our Unique Differentiators: Only NeuroStar Has…

- **Practice Development Manager**
  - Delivers the NeuroStar STARS SOLUTION, a proven framework to grow your NeuroStar practice.

- **83% Response / 62% Remission**¹
  - Clinical results validated with 11 years of data via the largest Outcomes Registry.

- **$14.5M Marketing Spend**
  - To drive Consumer Awareness and grow the category.

Patients with Major Depressive Disorder are Underserved

- Lack of Efficacy
- Intolerable Side Effects
- Increased Need for Solutions Post-COVID

2. Per STAR*D patients that have failed one or more antidepressant trial of adequate dose and duration

US Adults suffering from MDD

21.0 MILLION

US Patients with MDD being treated

13.9 MILLION

Current Solution: Antidepressant Medications

6.4 MILLION

Poorly served

1,2,3
Limitations of Antidepressant Medications

The largest prospective clinical trial of MDD ever conducted, STAR*D, showed that treatment resistance causes a patient’s chance for remission to decrease with each subsequent medication attempt.

STAR*D Study n = 4,041

STAR*D also showed discontinuation due to side effects increases with each medication attempt.
NeuroStar Delivers Proven Results

Real World Clinical Rating for Patients with MDD

**RESPONSE**
Significant relief in depression symptoms

83%

**REMISSION**
Depression went away

62%

Only NeuroStar has...
Substantial Body of Clinical Evidence

Safety Record
- 5.0 million+ treatment sessions delivered globally
- Over 141,000 patients treated
- Low discontinuation rate from adverse events ~5%¹

Investigator-initiated Trials
- More than 65 studies with over 1,900 patients
- Wide range of conditions, including anxiety, bipolar disorder, pain, PTSD, addiction, schizophrenia, tinnitus, and others

¹ O'Reardon et al. (2008)
Only NeuroStar has...
Patented Contact Sensing Technology

Delivers Consistent and Repeatable Treatment

- The smallest movements can result in a dramatic loss of the prescribed TMS dose
- Even 1 mm movement away from the head can result in **40% loss** of the TMS prescribed dose
- Continuous contact sensing solves this problem

**Contact Sensing**

- Constantly monitors patient contact with the NeuroStar coil and alerts the clinician if the coil loses contact with the scalp or is angled incorrectly
- Only NeuroStar Advanced Therapy provides real-time feedback about the coil’s angle and contact

**Good Contact**

**Bad Contact**

1mm is the equivalent of 3 grains of salt
Only NeuroStar has...
Proprietary TrakStar® Data Management System

>141,000 Total NeuroStar patients treated worldwide

>14,793 Total Outcomes Registry patients

World’s Largest Depression Outcomes Registry

Outcomes Registry Peer-reviewed Publications¹,²,³

TrakStar makes automated large-scale data collection feasible

Contributes to new and future indications

Only NeuroStar is...
Invested in Understanding the Market

67% of patients with MDD are unhappy with their current treatment

Based on market research study of 500 diagnosed depression patients
